

## Biography

Julien Martin is a Research Wildlife Biologist at the US Geological Survey-Southeast Ecological Science Center. He obtained a PhD in the department of Wildlife Ecology and Conservation at the University of Florida. He is a courtesy assistant professor: (1) in the Department of Wildlife Ecology and Conservation at the University of Florida; and (2) in the College of Marine Science at the University of South Florida. His expertise includes: estimation of demographic parameters, population dynamics and the application of decision theory to natural resource management.

## Publications

Martin, J., Sabatier, Q., Gowan, T., Gurarie, E., Ortega, J., T., Deutsch, C., Calleson, S. (2016). A quantitative framework for investigating the risk of deadly collisions between marine wildlife and watercraft. *Methods in Ecology and Evolution*, 7, 42-50.

Edwards HH, Martin J, Deutsch CJ, Muller RG, Koslovsky SM, Smith AJ, et al. (2016) Influence of Manatees' Diving on Their Risk of Collision with Watercraft. *PLoS ONE* 11(4): e0151450
