

## Table of Contents

List of Tables	iv
List of Figures	vii
Abstract	xii
Chapter 1: Introduction	1
Chapter 2: Literature Review	6
Shelf Sedimentary Morphology	6
Sedimentary Transport and Processes	16
Studies on Smaller Temporal and Spatial Scales	16
Studies on Greater Spatial and Temporal Scales	20
Data and Models Over Different Scales	22
Applications of Sediment Transport Research	24
Relationship Between Sedimentary Properties and Sonar Backscatter	25
Geotechnical and Geoacoustic Properties of Sediments	25
Quantifying the Relationship of Sonar Backscatter and Sediment Properties	27
Summary	30
The Need for Further Study on the West Florida Shelf	30
Subaqueous Sand Ridges on the West Florida Shelf	30
Hydrologic Conditions	34
Geographic Extent of the Sand Ridges	35
Sedimentary Characteristics of the Sand Ridges	35
Summary	36
Chapter 3: Study Areas and Settings	37
General Characteristics of The West Florida Shelf	37
Data from Previous Studies of the IRB and MS Study Areas	38
IRB Study Area	38
MS Study Area	39
Hydrology	40
Summary	41
Chapter 4: Methods: Collection and Processing of Geophysical, Sedimentary, and Hydrologic Data	42
Side-Scan Sonar Collection, Processing, and Analysis	42
Side-Scan Collection and Processing	42
Side-Scan Analysis	44
Collection, Processing and Analysis of Surface Sediment Samples	50

Sediment Sample Collection	50
Sample Processing	55
Grain Size Analysis	56
Carbonate Content Analysis	57
Collection, Processing, and Analysis of Box Cores	59
Box Core Collection	59
Box Core Processing	60
Box Core Analysis	62
Collection and Analysis of Current Meter Data	63
Collection of Current Meter Data	63
Current Meter Data Analysis	65
Chapter 5: Results: Observations and Analyses	67
Side-Scan Sonar	67
MS Study Area Mosaics	68
MS Study Area GIS Analysis	70
IRB Study Area Mosaics	84
IRB Study Area GIS Analysis	90
IRB Sub-study Region Mosaics	110
IRB Sub-study Region GIS Analysis	110
Summary	118
Box Cores	118
MS Study Area	118
IRB Study Area	128
Summary of Box Core Results	138
Sediment Samples	139
MS96M	139
MS98JL	145
IRB97N	150
IRB98JL	158
IRB98N1	167
IRB98N2	176
Spatial and Temporal Comparisons of Sedimentary Properties	185
Analysis of Sedimentary Properties and Backscatter Intensity	190
Current Meter Data and Analyses	203
MS98S4	203
IRB98S4A	206
Comparison of MS98S4 and IRB98S4A Data	206
IRB98S4B	212
Initiation of Sediment Movement	216
Summary	221
Chapter 6: Discussion	222
Spatial Comparison of the IRB and MS Study Areas	222
Sedimentary Features	222
Sedimentary Properties	225
Sub-Surface Sedimentary Structures	227
Hydrologic Conditions	229
Comparison Summaries	230
Sediment Transport Over Seasonal/Annual Temporal Scales	231
MS Area	231

IRB Area	234
Summary	239
Sediment Transport Over A One-Week Temporal Scale Related to Frontal Passage	240
Discussion	241
Summary	243
Sedimentary Properties and Side-scan Backscatter Intensity	244
Relationship of Sedimentary Properties	244
Multiple Regressions	246
Regression Effectiveness	249
Summary	251
Chapter 7: Conclusions	252
Spatial Extent and Spatial/Temporal Changes in Sedimentary Features	252
Hydrologic Processes Affecting Sediment Movement	253
Geotechnical/Geoacoustic Relationships	254
Relationship Between Spatial Scales	254
References	255
Appendices	272
Appendix A. Sedimentary Grain Size Distribution Data	273
Appendix B. F- and t-Statistics for Sedimentary Data	297
Appendix C. Backscatter Values, Correlations, and Multiple Regression Outputs	301
Appendix D. Calculations of Shields $\beta$ and Boundary Reynolds Numbers	316
Appendix E. Meteorological Data, Tampa International Airport, November 1998	321
Appendix F. Bathymetry and Seismic Reflection Profile Data	323
