

## **Brad E. Rosenheim**

College of Marine Science  
University of South Florida  
140 7<sup>th</sup> Avenue South  
Saint Petersburg, Florida 33701

Tel. 727-553-3354  
email: [brosenheim@usf.edu](mailto:brosenheim@usf.edu)  
web: [www.marine.usf.edu/rosenheim/BER-Group.html](http://www.marine.usf.edu/rosenheim/BER-Group.html)

## **Biographical Information**

### **Education**

- 2005            Ph.D., University of Miami, Rosenstiel School for Marine and Atmospheric Science  
1999            B.S. (*magna cum laude*), University of Vermont, Environmental Science major, Geology concentration

### **Professional Experience**

- 2016-present    Associate Professor, College of Marine Science, University of South Florida  
2013-2016       Assistant Professor, College of Marine Science, University of South Florida  
2008-2013       Assistant Professor, Department of Earth and Environmental Sciences, Tulane University  
2005-2007       Postdoctoral Investigator, Woods Hole Oceanographic Institution

### **Honors and Awards**

- 2010            Weiss Presidential Teaching Fellow Finalist, Tulane University  
2000            Outstanding Student of the Year, Marine Geology and Geophysics, University of Miami  
1999            Magna cum laude distinction, University of Vermont  
1999            Induction into Alpha Chapter of Vermont, Phi Beta Kappa  
1999            Charles Doll Award, Top Geology Department student, University of Vermont  
1997-1999       John Dewey Scholar, University of Vermont  
1995-1999       Beard Family Scholarship, College of Arts and Sciences, University of Vermont

### **Professional Society Memberships**

American Geophysical Union, American Chemical Society, Geological Society of America, European Geosciences Union, La Société Française des Isotopes Stables, Phi Beta Kappa

## **Extramural Funding**

Total Research Funding to Date:                    \$4.86 million

### **Current or Recommended-for-Funding Grants**

- NSF Chemical Oceanography “Collaborative Research: What Happens to Terrestrial Organic Matter in the Ocean? Solving the Mystery Behind an Iconic Question.” September 1, 2019-August 31 2022. (Recommended for funding February 22, 2019, \$357,690). Lead PI: **Brad Rosenheim** University of South Florida
- NIFA/USDA (via NASA ROSES) “Organic carbon biomass, burial, and biogeochemistry in blue carbon ecosystems along the South Florida Coast: Climate change and Anthropogenic Influences.” May 15, 2017 – May 14, 2020. (2017-67003-26482, \$1,330,000). Lead PI: Joseph Smoak, University of South Florida Saint Petersburg
- NSF Polar Programs “Collaborative Research: Subglacial Antarctic Lakes Scientific Access (SALSA): Integrated study of carbon cycling in hydrologically-active subglacial environments.” September 1, 2016 – August 31, 2019. (PLR-1543347 \$395,644). Lead PI: John Priscu, Montana State University
- NSF Polar Programs “Collaborative Research: Time Matters – A comparison of diatom <sup>14</sup>C and Thermochemical <sup>14</sup>C dating methods in sediment records of ice retreat from the East and West Antarctic Margins.” March 15, 2017 – March 14, 2020. (PLR-1644117 \$488,390). Lead PI: **Brad Rosenheim**, University of South Florida

### **Completed Grants**

- NSF Paleoperspectives of Climate Change “Collaborative Research: Partitioning early Holocene Laurentide v. Antarctic ice melt from high-resolution reconstruction of sea-level rise and glacial isostatic adjustment modeling.” June 1, 2015 – May 31, 2018. (OCE-1502977 \$151,794). Lead PI: Torbjörn Tornqvist, Tulane University
- NSF Sedimentary Geology and Paleobiology “Collaborative Research: Continuous vs. episodic fluviodeltaic sedimentation: Implications for carbon sequestration and coastal restoration.” June 15, 2012 – May 31, 2015. (EAR-1148005 \$380,913, currently in no cost extension). Lead PI: Zhixiong Shen, Eastern Carolina University
- NSF Office of Polar Programs “Timing and duration of the LGM and post-LGM grounding events in Whales Deep paleo ice stream, eastern Ross Sea middle continental shelf.” October 1, 2012 – May 31, 2016. (\$41,396, current). Lead PI: Phil Bart, Louisiana State University
- NSF Paleoperspectives of Climate Change “Support for the 5<sup>th</sup> International Clumped Isotope Workshop.” September 1, 2015 – August 31, 2016. (\$10,000). Lead PI: **Brad Rosenheim**, University of South Florida
- Gulf of Mexico Research Initiative RFP-I “Consortium for the Advanced Research of Transport of Hydrocarbon in the Environment.” November 1, 2011 – December 31, 2014 (\$841,693 – currently in no cost extension). Consortium Leader: Tamay Özgökmen, University of Miami
- NSF Paleoperspectives in Climate Change "Assessing Wind-driven Circulation Variability in the Subtropical N. Atlantic Using an Array of Archived Radiocarbon Records," June 1, 2009 to May 31, 2013. (OCE-0902980 \$255,073). Lead PI: **Brad Rosenheim**, Tulane University (sole PI)
- NSF Geosciences Instrumentation and Facilities “Development of a Programmed-temperature Pyrolysis/Combustion Reactor System for Radiocarbon Applications,” September 15, 2009 – August 31, 2013. (EAR – 0929752 \$215,153). Lead PI: **Brad Rosenheim**, Tulane University (sole PI)

NSF Geosciences Instrumentation and Facilities “RAPID: Increasing through-put of novel Ramped Pyrolysis Radiocarbon Preparation Technique for Gulf Coast oil spill studies - Instrumentation Development.” Sep. 1, 2010 – Aug. 31, 2013 (EAR – 1058517 \$183,369). Lead PI: **Brad Rosenheim**, Tulane University (sole PI)

NSF Ecosystems “Collaborative Research: RAPID: The 2011 Atchafalaya River Flood and a possible altered system state for the Atchafalaya River Delta Estuary.” July 1, 2011 – January 1, 2013. (DEB – 1141410 \$37,396). Lead PI: Brian Roberts, LUMCON

NSF Geobiology and Low-Temperature Geochemistry “Collaborative Research: Geochemical and isotopic time-series of marine and terrestrial degradation of petroleum in the 2010 Gulf of Mexico oil spill.” Aug. 1, 2010 – July 31, 2012. (EAR – 1045845 \$66,094). Lead PI: David Finkelstein, University of Tennessee

NSF SGER Geomorphology Program "Fate and Transport of Carbon and Sediment during a Mississippi River High Water Event," June 1, 2008 to May 31, 2009. (EAR-0832754, \$29,658). Lead PI: Alexander Kolker, LUMCON

Louisiana Board of Regents "Determining the Distribution of Ages in Sedimentary Organic Material Carried and Deposited by Mississippi River," June 1, 2009 to May 31, 2012. (\$190,080). Lead PI: **Brad Rosenheim**, Tulane University (sole PI)

### **Publications** (Advised student authors in italics, senior author in bold)

h-index = 20 (Google Scholar, 3 Mar 2019)  
citations = 1202 (Google Scholar, 3 Mar 2019)

### **Refereed Journal Articles and Book Chapters, in review**

Jung, J.; Rosenheim, B.E.; Conway, T.M.; Yoo, K.-C.; Lee, J.I.; Yoon, H.I.; Hwang, C.Y.; Yang, K.; Subt, C.; Domack, E.W.; Kim, J. (in review). “Microbial alteration of illite as a potential Fe source responding to depositional environments under the Larsen Ice Shelf C during the Holocene.” Nature Communications.

## **Abstracts, Presentations, and Non-Refereed Publications** (Advised student authors in italics, \*graduate student presenting, °undergraduate student presenting)

### **2018**

Vadman, K.J.\*; Shevenell, A.E.; Leventer, A.; Gulick, S.P.S.; Mawbey, E.; Huber, B.A.; Rosenheim, B.E. (2018). Abstract PP23E-1541, 2018 Fall Meeting, AGU, Washington, D.C., 10-14 December 2018.

King, T.M.\*; Rosenheim, B.E.; Shevenell, A.E.; Ingalls, A.E.; Carlson, L. (2018). “Did the Last Deglaciation Happen at the Same Time Everywhere in Antarctica? A Facies-based Comparison of Different Radiocarbon Chronometers in Antarctic Margin Sediment.” Abstract PP23E-1534, 2018 Fall Meeting, AGU, Washington, D.C., 10-14 December 2018.

Smoak, J.M.; Breithaupt, J.; Bianchi, T.S.; Vaughn, D.; Rosenheim, B.E.; Chambers, L.G. (2018). “Increasing accumulation of soil organic matter in mangrove forests could indicate greater-than-expected resilience to sea-level rise and enhance the ongoing carbon sink capacity.” Abstract B41C-06, 2018 Fall Meeting, AGU, Washington, D.C., 10-14 December 2018.

Schafer, C.\*; Rosenheim, B.E.; Smoak, J.M.; Moyer, R.P.; Chappel, A.R. (2018). “Are Mangroves More Effective Carbon Sinks than Previously Thought? A Comparison of Sediment Ages Versus Radiocarbon Ages Seems to Suggest So.” Abstract B23G-2581, 2018 Fall Meeting, AGU, Washington, D.C., 10-14 December 2018.

## **2017**

Smoak, J.M.; Rosenheim, B.E.; Moyer, R.P.; Radabaugh, K.; Chambers, L.G.; Lagomasino, D.; Lynch, J.; Cahoon, D.R. (2017). “Controls on Soil Organic Matter in Blue Carbon Ecosystems along the South Florida Coast.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

Rosenheim, B.E.; Subt, C.; Shevenell, A.E.; Guitard, M.; Vadman, K.J.; DeCesare, M.; Wellner, J.S.; Bart, B.J.; Lee, J.I.; Domack, E.W.; Yoo, K.-C.; Hayes, J.M. (2017). “Invited: Chronicling ice shelf history in the sediments left behind.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

Jung, J.; Yoo, K.-C.; Yang, K.; Lee, J.I.; Yoon, H.I.; Hwang, C.Y.; Subt, C.; Rosenheim, B.E.; Domack, E.W.; Kim, J. (2017). “Nano-scale investigations on clay minerals during the Holocene climate optimum; Larsen Ice Shelf, Antarctica.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

Subt, C.\*; Rosenheim, B.E.; Lee, J.I.; Yoo, K.C.; Browne, I.M.; Shevenell, A.E. (2017). “Temperature under the Tongue: A paleotemperature record of the Drygalski Ice Tongue with improved chronology of ice retreat.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

Jankowski, K.L.\*; Shen, Z.; Tornqvist, T.E.; Stepanoitis, E.; Rosenheim, B.E. (2017). “Reimagining Carbon Sequestration in Fluviodeltaic Systems: Contributions from Clastic Overbank Deposits versus Peat.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

Stepanoitis, E.; Vetter, L.; Tornqvist, T.E.; Rosenheim, B.E.; Milne, G.A. (2017). “A Relative Sea-Level Record from the Mississippi Delta, 7.7-10.7 ka.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

Moyer, R.P.; Khan, N.; Radabaugh, K.; Engelhart, S.; Smoak, J.M.; Horton, B.; Rosenheim, B.E.; Kemp, A.; Chappel, A.R.; Schafer, C.; Jacobs, J.A.; Dontis, E.E.; Lynch, J.; Joyse, K.; Walker, J.S.; Halavik, B.T.; Bownik, M. (2017). “Sedimentary and Vegetative Impacts of Hurricane Irma to Coastal Wetland Ecosystems across Southwest Florida.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

King, T.M.\*; Rosenheim, B.E. (2017). “Mapping Vital Effects: Unlocking the Archive of Deep Sea Stylasterid  $^{18}\text{O}$  and  $^{13}\text{C}$ .” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

Reynolds, C.E.\*; Richey, J.N.; Fehrenbacher, J.S.; Rosenheim, B.E. (2017). “Environmental controls on the geochemistry of *Globorotalia truncatulinoides* in the Gulf of Mexico: Implications for paleoceanographic reconstructions.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

Suzuki, K.\*; Kobayashi, D.; Rosenheim, B.E.; Omori, T.; Polyak, L.; Nam, S.I. (2017). “Can we constrain postglacial sedimentation in the western Arctic Ocean by ramped pyrolysis  $^{14}\text{C}$ ? A case study from the Chukchi-Alaskan margin.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

Peck, D.\*; Rosenheim, B.E.; Ridge, J. (2017). “Tapping the deglacial secrets of Lake Oneida sediments: Establishing a connection between radiocarbon and paleomagnetism in Fish Creek sediments.” 2017 Fall Meeting, AGU, New Orleans, LA, 11-15 December 2017.

## **2016**

Stepanoitis, E.; Vetter, L.; Tornqvist, T.; Rosenheim, B.E. (2016). “Investigating Early Holocene sea level rise in the Mississippi delta within a global context.” 2016 Fall Meeting, AGU, San Francisco, CA, 12-16 December 2016.

DeCesare, M.\*; Bart, P.J.; Rosenheim, B.E. (2016). “New constraints on post-LGM WAIS retreat from the Whales Deep paleo-ice-stream trough in Eastern Ross Sea.” 2016 Ocean Sciences Meeting, American Geophysical Union, New Orleans, LA, 21-26 February 2016.

Evans, M.\*; Rosenheim, B.E.; Bacosa, H.P.; Liu, J.; Liu, Z. (2016). “Using Ramped Pyrolysis – Gas Chromatography – Mass Spectrometry to evaluate petroleum hydrocarbons following the Deepwater Horizon oil spill.” 2016 Ocean Sciences Meeting, American Geophysical Union, New Orleans, LA, 21-26 February 2016.

Rosenheim, B.E.; Shevenell, A.E.; Domack, E.W.; Subt, C.; Leventer, A. (2016). “Regional correlation of improved radiocarbon dates from the laminated facies of Antarctic margin

sediment from Anvers Trough, Antarctic Peninsula.” 2016 Ocean Sciences Meeting, American Geophysical Union, New Orleans, LA, 21-26 February 2016.

*Subt, C.\**; Yoon, H.; Yoo, K.-C.; Lee, J.I.; Domack, E.W.; Rosenheim, E.W. (2016). “Ramped PyrOx  $^{14}\text{C}$  with a twist: Improving radiocarbon chronologies on highly detrital marginal Antarctic sediments.” 2016 Ocean Sciences Meeting, American Geophysical Union, New Orleans, LA, 21-26 February 2016.

Vetter, L.; Schreiner, K.M.; Rosenheim, B.E.; Tornqvist, T. (2016). “Coastal marsh longevity, ecological succession, and organic carbon dynamics during early Holocene sea-level rise.” 2016 Ocean Sciences Meeting, American Geophysical Union, New Orleans, LA, 21-26 February 2016.

Walker, B.D.; Druffel, E.R.M.; Griffin, S.; Kolaskinski, J.; Roberts, B.J.; Xu, X.; Muller-Karger, F.; Rosenheim, B.E. (2016). “Sources and cycling of dissolved organic carbon in the Gulf of Mexico: Insights from stable ( $\delta^{13}\text{C}$ ) and radiocarbon ( $\Delta^{14}\text{C}$ ) signatures.” 2016 Ocean Sciences Meeting, American Geophysical Union, New Orleans, LA, 21-26 February 2016.

## **2015**

Fernandez, A.; Rosenheim, B.E.; Swart, P.; Lapen, T.; Andreasen, R.; Karnauskas, K. (2015). “What role does the N. Atlantic subtropical cell play in warming the shallow underwater of the Caribbean Sea on decadal to centennial time scales? Constraints from radiocarbon records across the tropical Atlantic.” 2015 Fall Meeting, AGU, San Francisco, CA, 14-18 December 2015.

Rosenheim, B.E., Domack, E.W.; Shevenell, A.; *Subt, C.* (2015). “Time matters: Increasing the efficiency of Antarctic marine geology and paleoceanography expeditions by providing improved sediment chronology.” 2015 Fall Meeting, AGU, San Francisco, CA, 14-18 December 2015.

Rosenheim, B.E.; Vetter, L.; Galy, V.; Plante, A.; Mollenhauer, G.; Hemingway, J.; Grant, K.; Derry, L. (2015). “Thermochemical  $^{14}\text{C}$  spectra and carbon turnover time in soils – a (changing?) latitudinal gradient? (**Invited**).” 2015 Fall Meeting, AGU, San Francisco, CA, 14-18 December 2015.

Williams, E.K.; Rosenheim, B.E. (2015). “Impacts of soil organic stability on carbon storage in coastal wetlands.” 2015 Fall Meeting, AGU, San Francisco, CA, 14-18 December 2015.

Shevenell, A.E.; Ishman, S.; Domack, E.W.; Leventer, A.; Rosenheim, B.E.; Vadman, K. (2015). “A complex deglacial retreat history of the Anvers Island Trough paleo-ice stream.” 2015 Fall Meeting, AGU, San Francisco, CA, 14-18 December 2015.

Rosenheim, B.E. (2015). “**Keynote**: Ramped PyrOx  $^{14}\text{C}$  – Advances in the thermochemical analysis of sedimentary and soil organic matter.” 22<sup>nd</sup> International Radiocarbon Conference, Dakar, Senegal, November 16-20, 2015

- Ishman, S.; Shevenell, A.; Domack, E.; Leventer, A.; Rosenheim B.E.; Vadman, K.; Prentice, M. (2015). “Using microfossil and biogeochemical data to resolve the deglacial history of the Anvers Island trough, west Antarctic Peninsula margin.” The Geological Society of America, Baltimore, Maryland, November 1-4, 2015.
- Wallace, D.; Donnelly, J.P.; Woodruff, J.D.; van Hengstum, P.J.; Rosenheim, B.E.; Horgan, M.C. (2015). “Paleotempestological reconstruction of western Atlantic Holocene hurricane impacts from Mangrove Lake, Bermuda.” The Geological Society of America, Baltimore, Maryland, November 1-4, 2015.
- Peck, D.A.; Domack, E.W.; Rosenheim, B.E.; Leventer, A.; Shevenell, A.E. (2015). “Evidence for extensive volcanism in the deglaciation of the Hugo-Anvers Island Trough.” The Geological Society of America, Baltimore, Maryland, November 1-4, 2015.
- Vetter, L.; Schreiner, K.; Rosenheim, B.E.; Kohl, B.; Steinmetz, B.; Newsom, L.; Tornqvist, T. (2015). “Paleoenvironmental reconstruction of coastal marsh successions during Early Holocene sea-level rise.” Goldschmidt Abstracts, 2015, 3264. Prague, Czech Republic, Poster – Session 09a. August 16-21, 2015.
- Rosenheim, B.E.; Roberts, B.J.; Van Metre, P.; Galy, V.; Shields, M; Cui, X.; Bianchi, T.S. (2015). “Domination of soil in  $^{14}\text{C}$  age spectra in sediments from a major river system – implications for carbon cycling.” Goldschmidt Abstracts, 2015, 2678. Prague, Czech Republic, Oral – Session 11b. August 16-21, 2015.
- Kolasinski, J.; Rosenheim, B.E. (2015). “Projection of the Deepwater Horizon oil spill in the Gulf of Mexico water column using biogeochemical tracers.” 2015 Gulf of Mexico Oil Spill and Ecosystem Conference, Houston, TX. Poster 141/P-012-05.

## **Academic Activities**

### **Courses Taught**

OCE6934.648F15 (USF): Stable Isotope Geochemistry. This course was co-taught with David Hollander. This course features condensed intensive lectures with problem sets for 9 weeks, with simultaneous development of an independent research project for graduate students. After a mid-term exam, the class switches to a laboratory research and seminar module. Students present primary literature summaries that are important to their research, they carry out cutting edge research projects in the laboratory, they prepare a manuscript-type report, and they present their findings orally in front of the class.

OCE6934.646F14 (USF): Quaternary Marine Geochronology. This course has been co-taught with Eugene Domack. It relies heavily on laboratory capabilities of the Ramped PyrOx system as students are expected to work collaboratively on geochronological analyses. The students are assessed using a mid-term take-home examination and a collaborative manuscript that is to be publication-ready.

OCC6050.647S15 (USF): Chemical Oceanography. Co-taught with Kristen Buck, Robert Byrne, and David Hollander. This course is part of the core curriculum. I taught the ocean organic carbon cycling module of the course, I furnished exam questions for the midterm and the final examinations, and I participated in review sessions.

OCE6972.(648) (USF): I teach graduate students individually when they need to learn special topics intensively or for which there is not enough demand to warrant a formal course. Students design syllabi for these courses and I help them prepare learning outcomes, schedules of activities, and assessment in an iterative process. With limited TAs at CMS, this is valuable for learning curriculum development. We then use that syllabus as a template to conduct advanced literature research (with writing of an introduction to a manuscript as assessment), laboratory experiments (with writing manuscript drafts as an exercise for assessment), and research expeditions (for students that need to spend a large portion of the semester at sea, usually involving a presentation at sea graded by expedition participants).

OCE6971.(648) (USF): Thesis: Masters. Mentoring of M.S. students as primary adviser. This involves weekly progress meetings and filing of progress forms so that students participate actively in formulating goals and evaluating their performance.

OCE7910.(648) (USF): Directed Research: Doctoral. Mentoring of Ph.D. students as primary adviser. This involves weekly progress meetings and filing of progress forms so that students participate actively in formulating goals and evaluating their performance. Additional professional development is carried out in the form of expecting Ph.D. students to mentor other students in the research group, publication of peer-reviewed journal articles as lead author, and presentations at national and international conferences and workshops.

EENS 6210 (Tulane University): Carbon Cycle Seminar. This course uses David Archer's Carbon Cycle monograph as a basis to explore the literature concerning changes in the Earth's carbon cycle over several time scales in relation to current changes. It is discussion and writing intensive.

EENS 6080 (Tulane University): Climatology and Paleoclimatology of the Common Era. This seminar course is designed to familiarize graduate and advanced undergraduate students with literature concerning very Late Holocene climate and to acclimate students to use of large, publicly available data sets to analyze climate. The course involves literature surveys with a Matlab seminar once per week.

EENS 1300 (Tulane University): Earth: A Living Planet. This course was designed and implemented as an introductory environmental science course. A laboratory section of the course was designed by myself, Dr. Nicole Gasparini, Dr. Gerhard Piringer, and Dr. George Flowers, and implemented by Dr. Flowers in spring of 2010.

EENS/EBIO 6240 (Tulane University): Stable Isotopes in the Environment. This course is designed to familiarize upper level majors and graduate students with the theories and applications of stable isotope measurement in natural levels found in the environment. Half of the class involves lectures and problem sets, while the second half involves performing laboratory analyses for a final class project.

EENS/EBIO 2230 (Tulane University): Introductory Oceanography. This course is aimed at science majors, but accessible to non-majors as well. It involves 3 lectures per week, plus a field trip to LUMCON to perform oceanographic measurements aboard a coastal research vessel.

MSC 101 (University of Miami): Introduction to Oceanography, Non-Science Majors. This course gave me the opportunity to teach lectures on topics as broad as wave physics to coral physiology in a delivery suitable for all backgrounds. I have received excellent reviews from students in these classes and have succeeded in presenting both traditional blackboard lectures and multi-media presentations.

### **Students Advised Directly**

Carolyn Schafer, M.S., in progress, USF  
Francesca Toledo-Cossu, Ph.D., in progress, USF  
Dylan Peck, M.S., in progress, USF  
Theresa King, Ph.D., in progress, USF  
Ryan Venturelli, Ph.D., in progress, USF  
Caitlin Reynolds, M.S., in progress, USF  
Devon Firesinger, M.S., 2017, USF  
Cristina Subt, Ph.D., 2017, USF  
Alvaro Fernandez, Ph.D., 2015, Tulane University  
Elizabeth Williams, Ph.D., 2014, Tulane University  
Matthew Pendergraft, M.S., 2013, Tulane University  
Emily Cardarelli, B.S. with honors, 2012, Tulane University  
Kimberly Roe, M.S. 2011, Tulane University  
Gabiella March, B.S. with honors, 2010, Tulane University  
Jennifer Douglass, B.S. with honors, 2009, Tulane University

### **Students Visiting from Other Universities**

Zoe Roseby, British Antarctic Survey, United Kingdom – June-July, 2017  
Kenta Suzuki, Hokkaido University, Japan – September, 2016  
Usman Muhammed, ETH-Zurich, Switzerland – August, 2016  
Rebecca Parker, University of Otago, New Zealand – June-July, 2016  
Thomas Andro, Université de Brest Occidentale – February – July, 2015  
Alexis Cuvillier, Université de la Réunion – October, 2014  
Kimberly Allison Fangman, University of Houston – May-June, 2011  
Jennifer Santoro, Hamilton College – May – August, 2010

### **Students Advised on Research Committee**

Travis Mellett, Ph.D., USF, in progress  
Yingli Zhu, Ph.D., USF, in progress  
Kara Vadman, Ph.D., USF, in progress  
Selena Johnson, Ph.D., USF in progress  
Rebekah Larson, Ph.D., USF, in progress  
Joshua Breithaupt, Ph.D., 2017, USF  
Sean Murray, Ph.D., 2016, University of Miami Rosenstiel School of Marine and Atmospheric Science  
Meredith Moss Evans, M.S., 2016, University of Texas Marine Science Institute  
Michelle Guitard, M.S., 2015, USF  
Victoria Troeger, B.S. with honors, 2013, Tulane University  
Kimberly A. Mead, M.S., 2012, University of Houston  
Rebecca L. Freeman, Ph.D., 2011, Tulane University  
Benjamin Jones, B.S. with honors, 2011, Tulane University  
Frida Zink, B.S. with honors, 2011, Tulane University  
Charlotte Sprehn, B.S. with honors, 2011, Tulane University

Amy Cone, M.S., 2010, Louisiana State University  
Johanna Nevitt, B.S. with honors, 2009, Tulane University

## **Laboratory Experience and Supervision**

Isotope Ratio Mass Spectrometry. I have experience using state of the art IRMS technology. I have used systems from VG Isogas, Thermo-Finnigan (Delta Plus), Finnigan MAT (251), Europa Geo (20/20) to analyze carbonates and waters. I have developed standardized laboratory computation programs for correction of isotope data and I have performed standardization of the Thermo-Finnigan Delta Plus with Kiel III carbonate device to overcome heterogeneities associated with small sample size capabilities. I have successfully adapted an Isoprime mass spectrometer to make clumped isotope measurements at the same precision as more expensive instrumentation, broadening the base of scientists who will participate in developing this method.

Radiocarbon Determination and Organics. My laboratory group currently runs two Programmed Temperature Combustion systems. We use this system for radiocarbon dating applied to questions of chronology and carbon cycling, as well as oil pollution in sediments.

Laser Ablation/Decomposition. I have used laser ablation as a fine scale subsampling tool for paleoceanographic studies. I have made several advances toward developing a technique to use CO<sub>2</sub> generated from laser decomposition of carbonate mineral surfaces for direct AMS determination of <sup>14</sup>C.

Minor and Trace Element Spectrometry and Spectroscopy. I experienced in operation of an Inductively Coupled Plasma spectroscope. I have used ICP-AE and OE spectrometers in both industry and academia. Most recently, I was responsible for standardizing a newly acquired Varian Vista Pro ICP-OES axial spectrometer to analyze large carbonate samples for trace elements and small carbonate samples for minor elements. I have performed standardization with seawater samples of various strengths. I have experience with ICP-MS, especially interfaced with a laser micro-sampling device.

Microscopy. I operated both epifluorescence and scanning electron microscopes for minor parts of my Ph.D. dissertation. I am familiar with the principles of these technologies and able to use them autonomously.

## **Field Work Experience**

July 7 – July 10, 2014: co-Chief Scientist. PE15-01 Water Column Sampling Cruise, R.V. Pelican, Consortium for the Advanced Research of Transport of Hydrocarbon in the Environment.

June 24 – June 29, 2013: Chief Scientist. PE13-33 Benthic Observations Cruise, R.V. Pelican. Consortium for the Advanced Research of Transport of Hydrocarbon in the Environment.

October 7- October 31, 2012: Shipboard Scientist. LMG12-11 LARISSA Cruise, Antarctic Peninsula. Gravity, piston, and kasten cores of paleo ice stream drape sediment.

June 30 – July 3, 2012: Chief Scientist. PE12-33 Benthic Observations Cruise, R.V. Pelican. Consortium for the Advanced Research of Transport of Hydrocarbon in the Environment.

April 2008 - present: Small boat surveying and sampling of Mississippi River (lower reaches) and Atchafalaya River. The research was originally carried out under an NSF SGER grant for sampling of suspended sediment and new sedimentation. The goal of continued research is to characterize this sediment in terms of the spectra of radiocarbon ages present both before and after deposition and to compare between to normal and low flow stages.

August, 2008 – July 2009: Sedimentation and reef survey, Lana'i, Hawaii. These research involves pilot funds from Tulane University (post Hurricane Katrina research enhancement funds) to commence a research collaboration in Hawai'i involving characterization of erosional processes in terms of land use change and climate change. Sedimentation and carbon transport from the ridges of the volcanoes to the reefs is the goal of measurement and quantification.

June, 2007: Submersible research cruise, Key West to Fort Lauderdale, Florida, in collaboration with the University of Miami and Harbor Branch Oceanographic Institution. Several submersible dives were made for collection of marine species living at depths less than 990m and of interest in paleoceanographic studies and pharmaceutical research.

May-June, 2003: Exploration of French Antilles for scuba-accessible sclerosponge specimens. Three week scuba exploration of all areas of the coast with either submarine grottoes or steep walls, both conducive to cryptic sclerosponge habitat.

October-November, 2002: Caribbean Atlantic Salinity Experiment (CASE-02) Cruise aboard the R/V Suncoaster. I participated in both legs of a month-long coral core collection expedition spanning the Bahamas to the St. Vincent Grenadines. Responsible for drilling corals by scuba using a hydraulic drill tethered to a small dinghy launched from the main vessel. Corals located using physical geography and existing literature to explore each island by snorkel.

August, 2002: Sequence Stratigraphy of the Madison formation. Field Assistant for the Comparative Sedimentology Laboratory of the U. of Miami. Measured stratigraphic section of the Madison formation outcropping in Montana.

May, 2002: Stage II of NSF-funded Sclerosponge Calibration Project, Discovery Bay, Jamaica. Sclerosponges were sampled after an incubation period of nearly 3 years. Other sclerosponges were re-stained with Calcein and thermistors were swapped and re-calibrated. Corals were also sampled to compare with proximal sclerosponge records.

September, 2001: Geochemical Classification of Bahamas Bank Sediment cruise, R/V Bellows. This cruise gridded the NW Great Bahamas Bank, sampling sediment and water every 10km. Analysis for salinity, grain type, and skeletal makeup of waters and sediment performed on-board.

May, 2001: Carbonate petrography class trip to Andros Island in the Bahamas. Studied Aeolian and shallow water carbonate deposits from the Pleistocene and Holocene as a class project. I took part in explorations of the supratidal mud flats of western Andros Island and sampled dolomite crusts forming in these unique environments.

August, 2000: Exploration of the Commonwealth of Dominica for mature coral colonies. Explored the leeward coast of Dominica for large heads of *Siderastraea sideraea* suitable for climate records and potential sclerosponge environments by scuba. Several *S. Sideraea* colonies were drilled pneumatically and brought back to Miami. No sclerosponges were found. Also assisted in surveying reef to quantify and monitor corals with known diseases.

August, 1999: Initiation of NSF funded Sclerosponge Calibration Project, Discovery Bay, Jamaica. Installed and calibrated temperature thermistors in submarine reef enclosure and stained sclerosponge surfaces using Calcein, a fluorochrome. Operations performed by scuba.

June-July 2000: Relocation of sediment traps and levels, Roatan, Honduras. I took part in the final part of an abiotic reef survey, relocating sediment measuring devices and recording reef transects for changes since the project was started.

July, 1999: Post-Hurricane Mitch abiotic reef assessment, Roatan, Honduras. This trip was planned to assess catastrophic changes to sections of reef due to the passing of Hurricane Mitch the previous year. Sedimentation measuring devices and coral transects were located by snorkel and scuba.

July, 1998: Sampling of *Montastraea annularis* for my undergraduate honors thesis, Roatan, Honduras. Land use patterns of the island were assessed and corals were sampled from long-disturbed area, recently-disturbed area, and pristine offshore control site.

### **Scientific Workshops Attended**

- 2014 SOM6 – 6<sup>th</sup> International Workshop on Soil Organic Matter Stabilization and Destabilization, Kiawah Island, South Carolina
- 2014 4<sup>th</sup> International Clumped Isotope Workshop, ETH Zurich, Zurich, Switzerland
- 2014 Korean Polar Institute Research Symposium, *invited speaker*.
- 2013 MOSSFA Working Group Meeting, Florida State University, Tallahassee, Florida
- 2013 3rd International Clumped Isotope Workshop, Harvard University, Boston, Massachusetts

- 2011 International Workshop on Small Scale Radiocarbon Analysis, ETH, Zurich, Switzerland
- 2010 1st International Clumped Isotope Workshop, University of Washington, Seattle, Washington
- 2006 IODP Caribbean Gateway Workshop, Austin, Texas
- 2006 CLIVAR Salinity Workshop, Woods Hole Oceanographic Institution, Woods Hole, Massachusetts

## **Outreach**

- 2011 National Public Radio Interview “In Cleaning Oiled Marshlands, A Sea of Unknowns” (<http://www.npr.org/2011/04/20/135571426/in-cleaning-oiled-marshlands-a-sea-of-unknowns>)
- 2010 National Geographic News “Exxon Valdez Lessons Applied in Gulf Coast Cleanup.” (<http://news.nationalgeographic.com/news/2010/12/101203-nsf-gulf-oil-weathered-vin-video/>)
- 2010 Public Broadcasting System Televised Panel “Science of the Spill.” ([https://www.youtube.com/watch?v=Q\\_G0qu0eUKw](https://www.youtube.com/watch?v=Q_G0qu0eUKw) )
- 2008-2011 NOLA S.M.I.L.E. (New Orleans, Louisiana, Science and Mathematics Inquiry Learning and Experience). Workshop for 3<sup>rd</sup> and 4<sup>th</sup> grade teachers in Southeast Louisiana focusing on Earth Science.
