
Project Oceanography

Spring 2002

Table of Contents

Unit I - Channel Islands National Marine Sanctuary

Program One - Introduction to the CINMS	1
CINMS Overview	3
Research within the Sanctuary	5
Life at Land Margins	6
Activity -Where's the Wreck?	8
Student Page -Visiting the Channel Islands Area	11
Program Two - Intertidal Ecology	12
Physical Description of the Rocky Intertidal Zone	12
Typical Animals of the Littoral Zones	13
PISCO: Intertidal Research	15
Activity -Roving People Count	17
Student Page -Intertidal Exploration	20
Program Three - Kelp Forests	21
Kelp Overview	21
Characteristics of Kelp Forests	22
Kelp Forest Monitoring	23
Activity -Build a Forest	27
Student Page -Kelp Harvesting	31
Program Four - Marine Reserves	32
Marine Reserves as Management Tools	32
Creating Marine Reserves	33
Technology used in the Marine Reserve Process	34
Activity -The Thumbs Have It!	35
Student Page -Marine Reserves	39
Vocabulary	40
References	44

Unit II - Monterey Bay National Marine Sanctuary

Program One - Introduction to the MBNMS	46
MBNMS Overview	48
Blue Whales	49
Rocky Intertidal Monitoring	51
Activity -A Crushing Experience	53
Student Page -Sanctuary Monitoring	55

Program Two - Jellies 56

 Cnidarians56

 Natural History of the True Jellies.....57

 What's Next?58

Activity-The World's Foremost Jelly Expert.....60

Student Page-Jellies62

Program Three - Cold Seeps 63

 Deep Water Discoveries63

 Ways of Making a Living.....64

 Diversity and Research65

Activity-Underwater Exploration67

Student Page-Deep Ocean Adventures69

Vocabulary70

References73

Unit III - Single-celled Organisms

Program One - Introduction to Single-celled Organisms..... 75

 Symbiotic Relationships76

 Dinoflagellate/Coral Symbiosis77

 Cyanobacteria78

Activity-Feeding Friends81

Student Page-Amazing Associations84

Program Two - Single-celled Organisms and Symbiotic Relationships 85

 Methods Used by Scientists85

 Research Design 186

 Research Design 288

Activity-Symbiosis Search.....90

Activity-Can You Fix This?92

Student Page-The Case of the Curious Observer94

Vocabulary95

References97

Unit IV - Deep-Sea Sediment Coring

Program - The Story of Deep-Sea Sediments 98

 Formation of Deep-Sea Sediments99

 Sampling of Mud in the Sea102

 Earth Stories told by Marine Sediments104

Activity-An Unsettling Experiment106

Student Page-Deep-Sea Sediments108

Vocabulary109

References111
